

# A NEVERSEEN NAUTICAL EXPERIENCE!

## OUR PACKAGES PROPOSAL

## Platypus is a hybrid between a boat and a semi-submersible able to sail and dive!

The Platypus is an innovative marine product, looking like a trimaran but with a central part connected to the boats by tilting arms in order to be on or under the water. She is able to immerse its pod and its passengers underwater at little bit less than 2 meters which gives a never seen submarine experience to them, the rest of the shell remain at the surface with the engines.

The Platypus is powered by two outboard motors, the boat is designed to accommodate either electrical or thermal engines and is made of aluminum component (color to define).

Her rear cockpit is providing compressed air to its passengers thanks to a hookah system and is equipped with a digital periscope to watch the surface from below.

All Platypus are delivered with Propeller cages to ensure the safety of passengers.

**Naval architect**

**VPLP** design

**Manufacturer**

FIRST EVER WORLDWIDE SEMI-SUBMERSIBLE

# BLUE OCEAN

**BLUE OCEAN** represents the DNA of the original platypus concept, with a blue and a whole equipment allowing a resort or a leisure operator to offer to their customers the whole ability of Platypus: navigate with 5 passengers on or under the surface.

The Platypus **BLUE OCEAN** answers to all requirements with

- A power of 100 HP providing a surface speed of 18 max.
- The digital periscope to watch what happens @ the surface... while navigating under the water
- The breathing system for up to 5 passengers including masks (communication system in option)
- A spoiler designed to welcome any additional accessories such as awning, radio, etc..
- Light for night navigation underwater

PRICE: 162 500 € (Pre-Tax Value)
